Introduction

Data in this edition of *World Jet Airplane Inventory* reflect, as accurately as possible, the status of the world's commercial jet airplane fleets (including some military derivatives) at the end of the year 1987.

World Jet Airplane Inventory is composed of a selected number of computer printouts from JETTRACK, a computer-based jet airplane inventory system kept by the Market Research Department of Boeing Commercial Airplane Company. Fleet data in this system are obtained from many different sources, including airframe manufacturers, airplane owners and operators, governments, and trade publications.

This document provides details for announced orders, deliveries, and inventories for all commercial jet airplanes built in the United States and Western Europe with a capacity of 60-seats and up. In addition, the year-end 1987 inventory data in Sections 4 and 6 include non-Russian operators of the Tupolev-134 and larger passenger airplanes built in the USSR.

Announced jet airplane orders are summarized in Section 1. Orders that were placed and later cancelled are treated as if they never occurred.

The tabulations include all airplanes delivered to the market through December 31, 1987. Not included are those manufacturer-owned airplanes that were never sold but are (or were) used exclusively for the manufacturers' private purposes, such as flight testing, route proving, short-term leasing, etc.

Many older airplanes are parked or stored at many different locations around the world. The cost of restoring these airplanes to flight status often far exceeds their market value. A serious attempt has been made to exclude these run-outs from the counted inventories shown in this document.

The fleet inventory data in previous issues of this book have often been quoted as "airplanes in service." It should be emphasized that the counted inventory includes a number of airplanes that were not in service at the end of 1987. Obvious cases are airplanes in the inventories of brokers, leasing companies, and airplane manufacturers. This last category generally consists of trade-in airplanes. A number of airplanes in the airline inventories were parked pending re-sale, repairs, hushkitting, freighter conversion, etc. Details on airplanes temporarily parked by airlines are given in the footnote to Section 1, Table 9, on page 10.

Leased airplanes are included in the operators' fleets. Section 7 provides details on airplanes leased out by airlines. The activities of leasing companies are not disclosed.

This new edition of the *World Jet Airplane Inventory* book includes some information that was not published in earlier editions:

Freighters:

Section 1, Tables 18, 19, and 20 provide summaries of the year end 1987 inventory of jet freighters by operator category. Included are pure freighters as well as convertibles which were in use as freighters.

Hushkits:

Details on DC-8, 707, and 720 equipment that had been hushkitted by the end of 1987 are given in Section 4 and Section 6. Additional airplanes will be hushkitted in the near future.

Freighter Conversions:

Footnotes to various tables in Section 4 provide details on freighter conversion of airplanes that were originally delivered as passenger airplanes or convertibles.

Abbreviations

Operator names in this document are often abbreviated and therefore may vary from official names.

Some frequently used abbreviations of operator names include:

AL Airline(s), Aerolineas, etc.	AVN . . . Aviation	INTL . . . International
AT Air Transport, AeroTransportes, etc.	AW Airways	SVC . . . Service, Services
	GOVT . . Government	TA Transportes Aereos, etc.

In Sections 1 and 5, three-letter abbreviations are used for airplane models. These abbreviations are mostly self-explanatory with the following exceptions:

CVR . . . Convair 880 and 990	M11 . . . MD-11	72S . . . 727-200
M80 . . . MD-80 (DC-9-80)	L10 . . . L-1011	737 . . . 737-100/200/T43A
D10 . . . DC-10	727 . . . 727-100	73Q . . . 737-300/400/500

Airplanes built in Western Europe:

A30 . . . A300	BAC . . . BAC One-Eleven	F10 . . . F100
A31 . . . A310	146 . . . BAe 146	MRC . . . Mercure
A32 . . . A320	CMT . . . Comet	TRD . . . Trident
A33 . . . A330	CON . . . Concorde	V10 . . . VC10
A34 . . . A340	CVL . . . Caravelle	

Sections 4, 6, and 7 provide details by airplane model and series.

Series ending with "F" or "FH" are original freighters, convertibles in permanent all-cargo use, and airplanes originally delivered as passenger airplanes that were later fitted with a large cargo door. The BAe 146-200QT is a freighter.

Series ending with "C" or "CH" are convertibles. Some airplanes in this category are used as freighters while remaining convertible.

Series ending with "M" are combis.

Series ending with "H" are hushkitted airplanes.

- Note:**
- 1) Deliveries exclude airplanes which were built, but which never entered the market. They are -or were- used by manufacturers for testing purposes, etc.
 - 2) W/O = Written-off: accidents, fire, sabotage, acts of war or terrorism.
 - 3) Retired: broken up or to be broken up in near future, cannibalized for parts, used for ground training or fire practice, used for structural testing, abandoned or stored in derelict condition, stored intact but not expected to fly again.
 - 4) Preserved: on display, or intended for future display.
 - 5) Stored: airplanes which have been stored intact for longer periods, but which could possibly be restored to flight status.

Summary Inventory By Owner/Operator Category
